

Kindergarten News

Mrs. Brann/Mrs. Hannon

January 23, 2017

All mCLASS assessments have been done! We will be discussing this information at your child's conference. Look for sign up information later this week.

This week we will complete our science unit, Investigating Properties. Students have used their five senses to learn about properties of objects. They have learned about color, shape, size, length, texture, weight, and materials objects are made from. We will continue to practice describing objects using these properties.

Reminder: This Friday is a regular school day! We lost the Teacher Workday during the snow/ice.

Dates

Friday, 1/27

- Snow/Ice make up - NO LONGER A TEACHER WORKDAY!

Don't forget to collect and send in your Boxtops for the school contest. Bring them to the classroom all week! We want to win again!

Don't forget to send in nonperishable food items for the Community Food Drive this week.

Sight Word Challenge

Beginning next week your child will bring home a list of sight words they need to learn during the month of February. When they can quickly read all the words on their list return their list so they can read them to me or Mrs. Hannon. Once they successfully read their list, they will get a new list to work on. All students that read their first list by the end of the month will get to eat their lunch in the classroom with me at the end of February. The goal is for ALL students to get to eat lunch in the classroom each month.
