Early Release

This week students will continue our study on living things. We have learned that living things need air, food and water and they grow or move on their own. Students will be assessed at the end of the week to see what they have learned so far.

Math Update: Based on our pre-assessment data, all students will receive core instruction for 3D shapes. Our focus for the next 2 weeks will be learning the names of 3D shapes (cube, sphere, cone, cylinder), their attributes, building these shapes and finding these shapes in various environments.

Spring Semester Field Trips

We still have students that have not returned the 2 permission slips sent home in last week's folder. The Science Made Fun field trip cost is \$8.00. The farm field trip is \$14.99. We are asking that you go ahead and pay for both field trips as soon as possible. Paying online is preferred. We appreciate your prompt attention to the forms and payments.

How can you help support us at home?

Please be sure that you are doing the fluency activities (in your child's purple folder) with your child at least 3 times per week.

Work on sight words daily with your child!

You should be reading with your child and letting your child read to you, daily.
